Max Wright Limited - Environmental Policy Statement/Procedures

It is the company's policy that in the course of the business, consideration be given to environmentally friendly and energy saving processes/designs.

Where practical it is the policy of Max Wright Limited and their management to:-

- 1) Engineer energy saving features into the panels we construct.
- 2) Recycle waste products generated by the business. Specifically:-
 - a) All Packing not used by the company is collected and re-used by our local packing company.
 - b) Sheet steel, Stainless steel and copper are all recycled by a specialist company.
 - c) Toner cartridges for printer and photocopier are collected by our stationery supplier for recycling.
- 3) Not use recycled equipment in our control panels, as customers generally stipulate that all items used should be purchased from new and that they have not been used for prior applications. However, sundry items used in the works/offices may be recycled. Specific examples are:-
 - a) We use recycled (refilled) toner and printer cartridges in our equipment.
 - b) Rags/Cleaning cloths are made from recycled materials.
- 4) Improve environmental performance where possible.
- 5) Work towards saving electricity and heating ourselves. We are gradually changing all fluorescent fittings to energy saving types. We have installed double glazing windows.

We have flexible working hours to save lighting/heating by working during daylight hours.

- 6) Prevent or reduce pollution/waste as far as practically possible.
